Deployment: Cloud Operations & Onboarding

RESTAURANT OPERATING SYSTEM

A Unified Cloud Operating System for Modern Dine-In Hospitality

QuickTable connects customers, line cooks, cashiers, and restaurant executives into a zero-latency digital network. Eliminates waiter delays, reduces table turnover times, and prevents lost revenue during peak rush hours.

+28%	+18%	< 1 sec	0%
Table Turnover Speed	**Higher Order Value**	**Kitchen Dispatch**	**Hardware Lock-in**
Customers order without waiting for staff	Visual menus drive beverage & dessert sales	Real-time WebSocket ticket sync to KDS	Runs on any phone, tablet, iPad, or POS

THE SEAMLESS DINE-IN ORDERING PIPELINE

1. **Scan Table QR**
   Guest scans acrylic QR code on table using standard phone camera. No app download.
2. **Select & Customize**
   High-definition dish photos, dietary badges, spice levels, and custom cooking notes.
3. **Chef Prepares**
   Order flashes on kitchen display with sound alert. Timer countdown tracks progress.
4. **Instant Settle**
   10-second checkout: Dynamic UPI QR code, cash/card tracking, and 80mm thermal receipts.

COMPREHENSIVE WEB APP CAPABILITIES

Guest Self-Ordering Portal
Zero-Friction Mobile Web Experience

- **Zero App Installation:** Opens instantly in Safari or Chrome when scanning table QR codes.
- **Rich Visual Menu:** High-resolution food photography, calorie counts, allergens, and spice indicators.
- **Custom Recipe Modifications:** Guests can specify instructions (e.g. *"Extra spicy"*, *"No cilantro"*).
- **Live Order Tracking:** Real-time progress bar from *"Order Placed"* to *"Cooking"* to *"Served"*.
- **Re-ordering & Add-ons:** Add drinks or desserts during the meal without flagging down busy staff.

Kitchen Display System (KDS)
Paperless Ticket Dispatch for Chefs

- **Instant WebSocket Dispatch:** Orders land on kitchen screens in under 500 milliseconds.
- **Urgency Countdown Timers:** Color-coded ticket badges (Green → Amber → Red) prevent food delays.
- **Audio Notifications:** Distinct chime alerts chefs to incoming tickets even in noisy kitchens.
- **Preparation Stages:** Chefs tap *"Preparing"*, *"Ready"*, and *"Served"* to keep front-of-house synced.
- **Station Categorization:** Separate views for Grill, Fryer, Bar Drinks, and Dessert stations.

Cashier POS & Fast Billing
Rapid Table Settlement & Invoicing

Executive Analytics & Multi-Branch
Command Center for Owners & Managers

- **10-Second Checkout:** Live table tabs calculate subtotals, GST/VAT taxes, and service charges.
- **Split Billing:** Even split or custom itemized division across multiple paying guests in 1 click.
- **Dynamic UPI QR Codes:** Generate instant on-screen QR codes for smartphone payment scanning.
- **Thermal Receipt Printing:** Plug-and-play with standard 80mm and 58mm ESC/POS receipt printers.
- **Payment Reconciliation:** Track Cash, Credit Card, and UPI with end-of-day register balancing.

- **Live Revenue Dashboard:** Monitor gross sales velocity, average check size, and hourly peak rushes.
- **Top-Seller Intelligence:** Identify highest-margin items and underperforming dishes instantly.
- **Multi-Branch Architecture:** Switch between 1 to 50+ restaurant locations with central franchise stats.
- **Role-Based Staff Access:** Dedicated restricted logins for Waiters, Chefs, Cashiers, and Admins.
- **Live Inventory Tracking:** Depletes ingredient stock levels automatically as orders are rung up.

WHY RESTAURANT CLIENTS SWITCH TO QUICKTABLE

⚡ Zero Proprietary Hardware

Runs smoothly on iPads, Android tablets, laptops, and existing Windows POS terminals. No $3,000 upfront hardware costs.

🛡️ Resilient Cloud Uptime

Continuous cloud synchronization with automated data backups prevents data loss during peak dinner rushes.

🚀 Fast 48-Hour Onboarding

tsubasa digital digitizes your menu items, prepares table QR acrylics, and trains your staff in under two days.

Enterprise Engineering & Dedicated Support

QuickTable is engineered and maintained by **tsubasa digital**. Includes guaranteed 99.9% uptime, bank-grade encryption, and priority technical assistance for growing restaurant brands.

WebSocket Real-Time Sync | Multi-Tenant Architecture | ESC/POS Thermal Ready | ISO 27001 Cloud Standard
