Thermal POS & Dynamic UPI

Cut Waiter Bottlenecks by 60%

Traditional paper menus and busy waiters cause customer frustration and lost dessert revenue. QuickTable creates a frictionless, instant ordering pipeline connecting tables, kitchen tablets, and cashier desks in real time.

- ✓ Zero app download required for diners (instant browser loading)
- ✓ Direct kitchen ticket dispatch in <500ms via WebSocket
- ✓ Hardware agnostic: Runs on any iPad, Android tablet, phone, or POS

Diners Order Directly From Their Phone

Customers scan a unique table acrylic QR code. They view appetizing photo menus, ingredient warnings, dietary tags, and submit orders in seconds without waiting for a waiter.

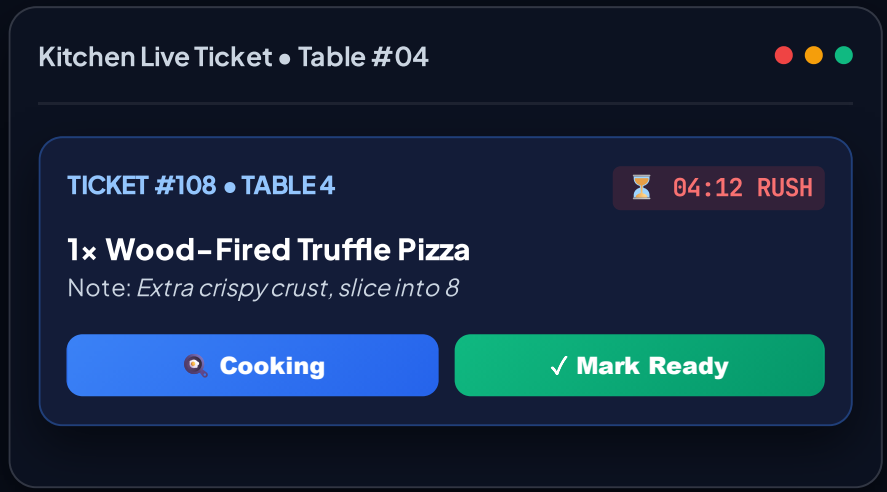

- ✓ High-res food photography, pricing, and chef recommendations
- ✓ Customizable dish cooking notes (e.g. 'Extra spicy', 'No onions')
- ✓ Live table status tracking without waving hands at staff

Zero Lost Tickets. Zero Screaming.

Replaces dirty paper slips with color-coded tablet stations. Chefs see order timestamp urgencies, allergen alerts, and tap to notify waitstaff when dishes are plated.

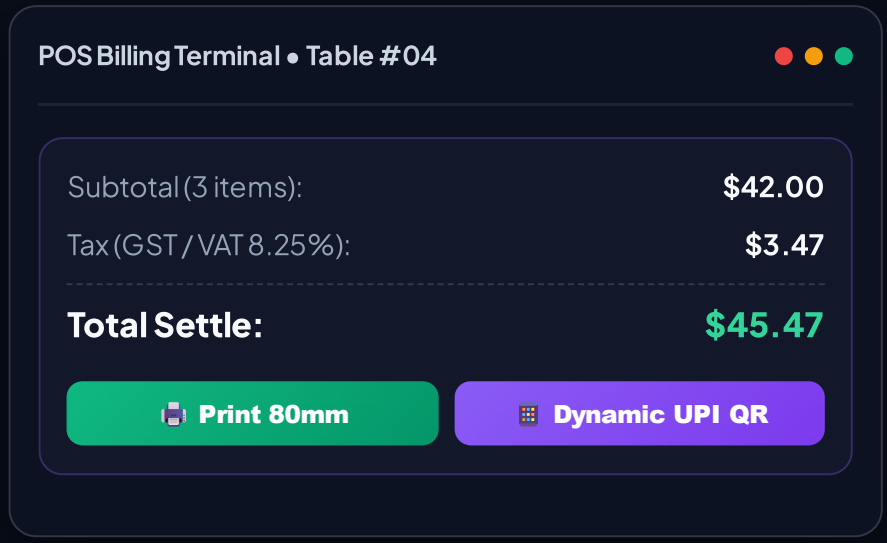

- ✓ Color-coded countdown clocks (Green/Amber/Red rush alert)
- ✓ Audible incoming ticket chimes for busy kitchen lines
- ✓ Table number, seat notes, and allergen modifications clearly highlighted

10-Second Checkout with Dynamic QR

Tables settle instantly with Cash, Card, or Dynamic UPI QR codes. One click splits the bill evenly and triggers thermal invoice printing.

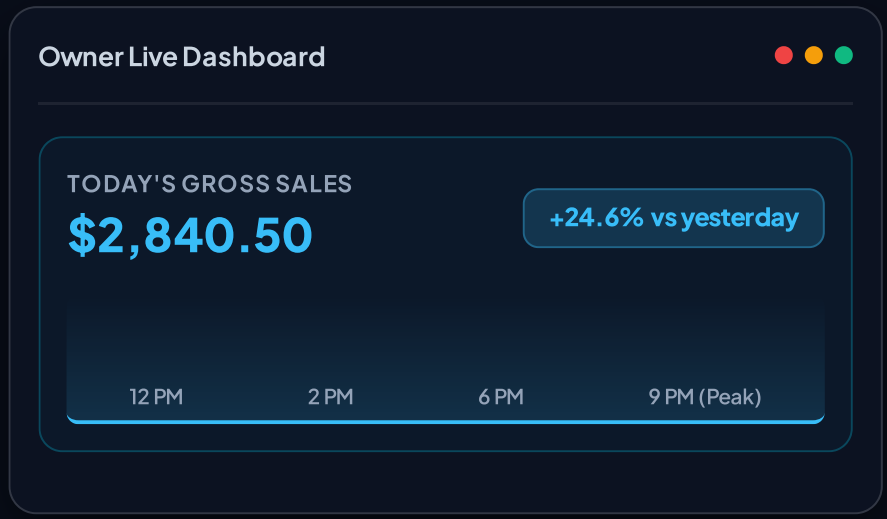

- ✓ Direct thermal printer integration (standard 80mm & 58mm paper)
- ✓ Dynamic UPI QR generation for instant customer smartphone payments
- ✓ Automatic tax calculations (GST / VAT) and custom service charges

Track Everything From Anywhere

Whether on vacation or in the back office, owners monitor gross margins, best-selling dishes, labor shifts, and multi-location branch performances in real time.

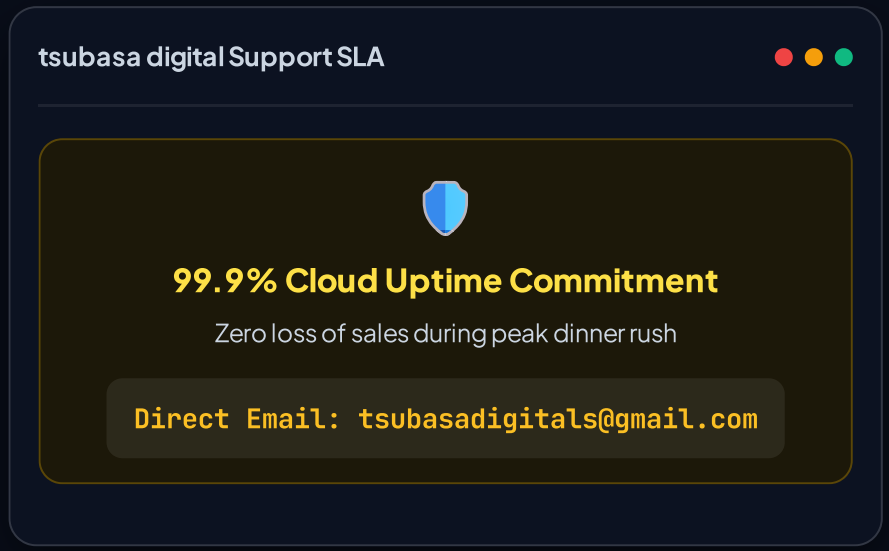

- ✓ Hourly sales velocity charts and peak-hour turnover trends
- ✓ Real-time kitchen inventory depletion alerts
- ✓ Custom staff access roles (Cashier, Waiter, Chef, Branch Manager)

Reliable, Dedicated & Customized

We don't just sell software. tsubasa digital handles full setup, menu input, staff training, and provides round-the-clock priority technical support so you never worry about downtime.

- ✓ Dedicated engineering contact: tsubasadigitals@gmail.com
- ✓ Bank-grade cloud encryption & automated daily database backups
- ✓ Tailored integration with local payment gateways and receipt hardware

How QuickTable Pays For Itself in 3 Days

By eliminating waiter order-taking delays and empowering customers to order drinks and desserts with one tap, QuickTable unlocks measurable additional monthly profit.

- ✓ **+15% Table Turnaround:** Seating 1–2 additional parties per table per night.
- ✓ **+8% Upsell Value:** High-resolution photos trigger impulse appetizer & dessert sales.
- ✓ **Zero Capital Risk:** No proprietary hardware required. Runs on existing devices.

ESTIMATED MONTHLY REVENUE INCREASE

10 TABLES	20 TABLES	40 TABLES
+$2,360	+$4,725	+$9,450
per month	Typical Casual	per month

✓ Return on Investment achieved in the first 72 hours of live operation

Live in Your Restaurant in 72 Hours
